► Massachusetts Population Projections

■ Population Projections for Massachusetts Municipalities

By agreement with the Massachusetts Secretary of The Commonwealth, the UMass Donahue Institute (UMDI) has produced population projections for all Massachusetts municipalities at 5-year intervals to 2030, using a model developed by Dr. Henry Renski of UMass Amherst. Detailed projections are available in this set by sex and 5-year age group for each city and town, along with a summary report on population growth in eight distinct Massachusetts regions. See the full list of downloads below.

Population Estimates Program Mission

With support from the Massachusetts Secretary of the Commonwealth, the Population Estimate Program's goal is to ensure that the **population estimates** and **counts** produced by the U.S. Census Bureau for Massachusetts geographies are as **accurate** and **comprehensive** as possible.

The Foreign Born in Massachusetts

- Compared to other states, Massachusetts ranks 8th in percent of total population that is foreign born, at 16.5% in 2016 according to the American Community Survey. Only seven other states including California, New York, New Jersey, Florida, Nevada, Hawaii, and Texas have larger percentages of foreign born population.
- Among Massachusetts' estimated 1,095,953 foreign born population, approximately 52% are naturalized U.S. citizens.
- Almost 20% of the foreign born population in Massachusetts entered the country after 2010, meaning that, on average, immigrants in Massachusetts are likely newer to the U.S. than those in the seven states with higher percentages of foreign born population (California, New York, Florida, etc.)
- In terms of most recent U.S. entries, Massachusetts ranks 4th in the U.S. - after District of Columbia, Hawaii, and Florida – for largest percent of residents who reported that their *residence one year ago* was outside of the U.S.

(U.S. Census Bureau American Community Survey ACS 2015 and 2016 1-year data).

The Foreign Born Population as a Percent of Total Population in MA and the U.S. 1850-2010

16.5% in 2016 ACS 1-Year Data, U.S. Census Bureau
